SUMMARY

Full Stack & AI Engineer with 8+ years of experience developing enterprise applications and AI-enabled solutions. Expertise in **Python**, **RESTful APIs**, **LLMs**, **Generative AI**, **Angular**, **.NET/C#**, and **ASP.NET** Experienced in building scalable architectures, leading engineering teams, and delivering production-ready software across AI, fintech, and retail domains.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Angular, Vue.js

Backend: Node.js, Express, Nest.js, Python, FastAPI, Flask, Java, Spring Boot, PHP, RESTful APIs

AI/ML & LLMs: SFT, RLHF, RLMF, Prompt Engineering, RAG Architectures, LangChain, Generative AI, Agent Workflows

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Kafka

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD Pipelines

Testing & Quality: Jest, pytest, JUnit

Blockchain & Web3: Web3.js, Solidity, Ethereum, Truffle, Smart Contracts, NFT Development, CertiK Audit

PROFESSIONAL EXPERIENCE

Senior AI Software Developer 03/2023 – 05/2026 | Palo Alto, CA, USA
Symphony AI

- Architected and maintained scalable **Python** backend services and **AI**-powered applications for enterprise solutions across retail, financial services, manufacturing, and IT.
- Engineered **RESTful APIs** and integrated enterprise data sources, knowledge graphs, and AI services to streamline business workflows.
- Designed scalable backend architectures using **Python**, **LLMs**, and data pipelines to support Eureka AI and industry-specific applications.
- Led the development of reusable services for Symphony AI's Eureka AI platform, supporting **Generative AI**, model orchestration, and intelligent agents.
- Delivered AI-powered workflows combining **LLMs**, predictive models, and intelligent agents to automate financial investigations, retail analytics, and industrial operations.
- Led a small engineering team, coordinated sprint delivery, conducted code reviews, and mentored developers to maintain high engineering standards.
- Improved **CI/CD** pipelines, automated testing, and containerized deployments to strengthen software quality, scalability, and release reliability.
- Oversaw full-stack development using **Python**, **RESTful APIs**, and frontend technologies for enterprise AI dashboards and intelligent copilots.
- Designed and optimized backend services for authentication, transaction monitoring, financial investigations, and AI-assisted decision-making.

Software developer 07/2020 – 02/2023 | Lima, Peru
Software Enterprise Services(SES)

- Developed and maintained enterprise web applications for financial, payroll, and business-management operations, supporting multiple corporate clients.
- Engineered responsive user interfaces using **Angular** for payroll processing, financial reporting, and employee-management systems.
- Implemented backend services using **ASP.NET**, **.NET/C#**, and **RESTful APIs** to support enterprise applications and improve system integrations.
- Delivered an enterprise payroll-management system using **Angular**, **.NET**, and **SQL** Server, enabling secure payroll processing and automated calculations.

- Optimized **SQL** queries and backend processes to reduce data-processing time and improve financial reporting performance.
- Created a digital-signature application using **.NET/C#**, PDFium Viewer, and iTextSharp to automate electronic document-signing workflows.
- Designed and launched a requirements-management system for tracking project requests, working hours, reports, and billing activities.
- Streamlined automated testing and **CI/CD** pipelines using GitLab to improve deployment reliability and reduce software defects.

Software engineer 07/2018 – 04/2020 | Lima, Peru
TeamSoft SAC

- Developed and maintained enterprise retail applications supporting 5 key operations: sales, inventory, promotions, customer management, and point-of-sale transactions.
- Engineered electronic invoicing functionality for Belcorp's retail sales system, integrating automated billing and transaction processing.
- Enhanced the RCS Tools mobile application with real-time **RMS.NET** integration, enabling secure stock access and efficient retail operations.
- Delivered the Physical Inventory module, improving inventory tracking, stock verification, and mobile usability.
- Implemented the Employee PIN module, strengthening employee access management and retail workforce operations.
- Supported **RMS/POS** systems for Belcorp, optimizing sales processing, inventory control, and retail-management workflows.
- Designed integrations connecting retail applications with enterprise systems, e-commerce platforms, and electronic invoicing services.

EDUCATION

Bachelor's Degree / Computer Science 2014 – 2018 | Lima, Peru
Technological University of Peru
